

THE TAMAR MOBILE SCISSOR LIFT

KEY FEATURES

- Fully Mobile
- Instant wheels free
- Flexible lifting points

PRODUCT INFORMATION

Our excellent value Tamar mid rise mobile scissor lift. The perfect addition to a home garage or commercial workshop wanting a portable ramp allowing them to utilise the space available to them.

Simply drive the car over the lift, swing out the arms and place your rubber pads then you're good to lift. Raising up to 1.2 metres with a pneumatic locking mechanism. Just because you have the potential to lift up to 1.2 metres does not mean you necessarily have to go up to that height, there are locking intervals at every three inches.

These lifts provide the ideal solution for any customer with restricted head height that may want to work outside because the garage or workshop is too low to effectively raise a vehicle. Providing the base is concrete a Tamar mobile lift can be employed outside, it is easily moved into the yard.
